

THE
STARFLEET REGISTRY

RESEARCHED AND COMPILED BY
JOHN W. BULLERWELL

Introduction

What you hold is perhaps the most comprehensive listing of the NCC- and NX-Federation Starfleet registration numbers ever created. Unfortunately, as comprehensive as it is, it is also confusing, error filled and riddled with mysteries.

These numbers are from the entirety of fandom *and* canon. If you're looking for a work of completely canon numbers and nothing else, this is not the document for you. Because the majority of these numbers come from fandom, there are a lot of discrepancies, and a lot of replication. There are numerous considerations I needed to make in compiling the list.

For instance, I worked under the assumption that a ship with a lettered suffix (for example NCC-1234-C) is carrying a registry 'tradition', like the *Enterprise*. Therefore, if fandom listed a NCC-XXX-A U.S.S. *No Name*, I assumed the was a NCC-XXX (no suffix) *No Name* as well. While this is indeed very unlikely, I included them for the sake of completeness, as the original originator likely intended.

Also, spellings in this document are intentional. If a ships name was *Merrimac*, I did not change it to *Merrimack*, or vice-versa. Again, it is assumed that the originator of the ship's name/number intended their spelling to be correct.

Some vessels had the same names and numbers, but were listed under two different class names. An example of this would be the Orka-class and the Clarke-class. Both classes had the same ships and numbers. I simply chose which class appeared in fandom first if I could determine it.

Along these same lines, sometimes fandom has several different classes with the same names, often hundreds or thousands of numbers apart. I list both.

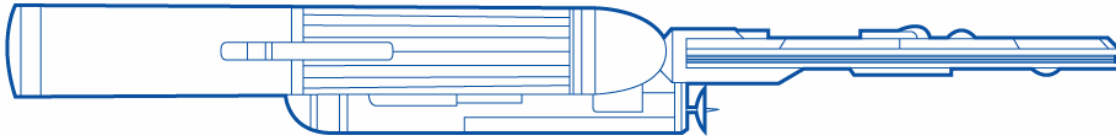

A great number of registry numbers have several starships listed. I offer no explanation for this in the document, but one might assume that Starfleet did a lot of jostling with the numbers. In the case of duplicate ships with the same numbers, canon vessels are listed first.

This work is a labour of love. But of course, I may have missed some numbers, and if so, I would ask that you contact me with corrections/additions at john.bullerwell@gmail.com.

NCC-1692	U.S.S. <i>Helin</i>	
	The <i>Helin</i> was a scientific survey ship on Neutral Zone patrol in Sector 21290 in 2293, stardate 9521.	
NCC-1697	U.S.S. <i>Essex</i>	Constitution-class
NCC-1699	U.S.S. <i>Richtofen</i>	Larson-class
NCC-1700	U.S.S. <i>Constitution</i>	Constitution-class
	Pathfinder vessel of the famous Constitution-class. The ship weighed 190,000 and was 288.646m long, 127.102m wide, and 72.6m high. It originally had a crew of 203, this was later boosted to 430 though a refit program. Montgomery Scott once served aboard the <i>Constitution</i> . During the ship's initial testing phase, the ship may have bore the registry number NX-1700. It was destroyed in 2268 by an encounter with a subspace rift.	

- NCC-1701 U.S.S. *Enterprise* Constitution-class
 Launched in 2245, the *Enterprise* had five commanders during her forty years of service; Captain Robert April, Captain Christopher Pike, Captain James T. Kirk, Captain Willard Decker and Captain Spock of Vulcan. The ship went through two major refits, one in 2261 and an intensive overhaul/redesign in 2269-71. The ship's motto was "...to boldly go where no man has gone before.". The ship was self-destructed at the Genesis planet by Admiral Kirk to prevent it from falling into Klingon hands. It was the first Federation starship to bear the name.
- NCC-1701-A U.S.S. *Enterprise* Constitution-class
 Second starship to bear the name. It was commissioned on Stardate 8442.5 from the San Francisco Fleet Yards. It remained under the command of James T. Kirk until its destruction at planet Chal in 2293.
- NCC-1701-B U.S.S. *Enterprise* Excelsior-class
 Third starship to bear the name, the *Enterprise-B* was commissioned on stardate 9715.5 under the command of Captain John Harriman.
- NCC-1701-C U.S.S. *Enterprise* Ambassador-class
 Fourth vessel to bear the name. Built at Earth Station McKinnley, the ship was lost in 2344 defending the Klingon outpost of Narendra III while under the command of Captain Rachel Garrett.
- NCC-1701-D U.S.S. *Enterprise* Galaxy-class
 Fifth vessel to bear the name, the third Galaxy-class vessel to be launched. The ship was commissioned on stardate 40759.9 from the Utopia Planitia Fleet Yards, Mars, under the command of Jean-Luc Picard. During its illustrious career, it was also commanded by Captain William T. Riker and Captain Edward Jellico. The ship crash-landed and was destroyed in the Veridian system in 2371.
- NCC-1701-E U.S.S. *Enterprise* Sovereign-class
 Sixth Federation starship to bear the name, this, the second vessel of the Sovereign-class, was launched from the San Francisco Fleet Yards on stardate 49027.5 under the command of Jean-Luc Picard.
- NCC-1701-F U.S.S. *Enterprise*
 Seventh Federation starship to bear the name.
- NCC-1701-G U.S.S. *Enterprise*
 Eighth Federation starship to bear the name.
- NCC-1701-H U.S.S. *Enterprise*
 Ninth Federation starship to bear the name.
- NCC-1701-I U.S.S. *Enterprise*
 Tenth Federation starship to bear the name.
- NCC-1701-J U.S.S. *Enterprise*
 Eleventh Federation starship to bear the name.
- NCC-1703 U.S.S. *Hood* Constitution-class
 One of the twelve original Constitution-class starships. The ship had at least five different commanding officers during its impressive career: Captain Kenneth

	Dodge, Captain Mark Rousseau, Captain Hojo Yorii, Captain Joaquin Martinez and Captain Lustig. Montgomery Scott once served aboard the <i>Hood</i> . It participated in the 2268 tests of the M-5 computer unit. Later that same year the ship's crew were killed by Romulan forces, though the ship itself was saved.	
NCC-1709	U.S.S. <i>Lexington</i>	Constitution-class
	One of the twelve original Constitution-class starships. The ship participated in the disastrous M-5 tests of 2268 while under the command of Commodore Robert Wesley.	
	U.S.S. <i>Christopher Pike</i>	Constitution-class
NCC-1710	U.S.S. <i>Kongo</i>	Constitution-class
	One of the twelve original Constitution-class starships. At one time commanded by Captain Toroyan, on stardate 9521 it was on Neutral Zone patrol.	
NCC-1712	U.S.S. <i>BonHomme Richard</i>	BonHomme Richard-class
	First vessel of her class, a sub-class of the Constitution-class design. James T. Kirk served aboard this vessel early in his career.	
NX-1713	U.S.S. <i>Confederate</i>	Constitution-class
	Experimental vessel that was used to test the "Warp-Accelerator Drive", a propulsion system based on designs by Virgil Brahms. Intended for near-transwarp speeds, it didn't work successfully. On it's maiden voyage the ship was captured by Romulan force and subsequently transported though time to the year 2371, where it was destroyed.	
NCC-1713	U.S.S. <i>Monitor</i>	BonHomme Richard-class
NCC-1714	U.S.S. <i>Hornet</i>	BonHomme Richard-class
	At one time, the <i>Hornet</i> was commanded by Captain Stephen Leedson.	
NCC-1715	U.S.S. <i>Merrimac</i>	BonHomme Richard-class
NCC-1716	U.S.S. <i>Endeavor</i>	BonHomme Richard-class
NCC-1717	U.S.S. <i>Yorktown</i>	Constitution-class
	Launched in 2247 from the San Fransisco Fleet Yards, it was one of the original twelve Constitution-class starships. In 2286 the <i>Yorktown</i> was commanded by Captain Joel Randolph. Previous commanding officers included Captain Jarobe, Captain Matthew Decker and Captain von Holtzbrinck. The ship was later retired and became a part of the Starfleet Museum at Starbase 178.

Fandom is a big place. That's what 40 years of material inevitable brings. But there are a few, particularly helpful websites I need to mention that graciously allowed me to include their excellent material in this body of work.

www.ex-astris-scientia.org

Bernd Schneider's excellent resource of technical material includes the EAS Fleet Yards, a section of starships designed and detailed by Bernd himself. Designed using very strict guidelines that Bernd has set out "what make a good starship design", the entire site is a resource familiar to all fans with internet access.

www.starfleet-museum.org

Masao Okazaki's website detailing the early vessels of Starfleet and the Federation, the incredible vessels here are designed are all of special historical importance to the Fleet. Again, like Bernd's site, the starships Masao has designed follow logical design rules and are also considered by most fans as the 'real' early history of the Federation.

Besides these two excellent sites, *many* other related sites were of special help when compiling this listing. And while some have drifted off into internet history, others still remain as valuable technical resources and sources of entertainment. These include, but are not limited to:
